

Xinru Ma is a Ph.D. candidate at Political Science and International Relations (POIR) at USC. Her primary research focuses on nationalism and its influence on maritime disputes. She uses game theoretical models and computational text analysis to investigate the formation and diffusion of nationalism, and collects original datasets on nationalist protests and behaviors of states and substate actors in the South China Sea via applying natural language processing methods to large-scale media and social media text. Xinru also holds Master's degree in Public Diplomacy (USC, '13) and Graduate Certificate in Homeland Security and Public Policy (USC, '16).
